### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-20, drawn to a shock absorber with piston, classified in class 188, subclass 322.15.
  - II. Claims 21-27, drawn to method for controlling flow, classified in class 188, subclass 266.
2. The inventions are distinct<sup>1</sup>.

Because these inventions are distinct, because the inventions have acquired a separate status in the art as shown by their different classification and because the fields of search for the groups are different, restriction for examination purposes as indicated is proper.
3. Note that in method claims 21-27, the steps for performing the method rather than the structure define the invention with the structure accorded little patentable weight.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas C. Butler whose telephone number is 703-308-2575. The examiner can normally be reached on m-f 5:30 am to 2pm.

<sup>1</sup> Note that claim 1 is broader than originally presented by deletion of pairs of bleed and blow off arrangements.
